

The IBB is a university institute which contributes to research and knowledge transfer in the fields of the management and economics of education.

Besides engaging in research and development, the Institute's aim is to provide services to teachers, school leaders, representatives of municipalities, ministries, and regional and national agencies as well as individuals in charge of the quality and development of educational institutions.

Our funding partners and customers are besides the classic research foundations, federal, cantonal and regional authorities, the cantons, communities, associations, counseling agencies, foundations, education institutions, in Switzerland and the other German speaking countries, but also in other European and non-European countries, e.g. the EU or OECD.
